Use of Some Tissues from Newly-Dead Persons.

Mayo Clinic Doctor Suggests

Nowly-Dead Persons.

By The Associated Free.

BALTIMOBE, June 15—The savaging of vital parts of the bodies of newly-dead persons for repairing the bodies of the living appears to Dr. Walter C. Alvarex to be a scientific possibility.

The fact that some tissues of the body are capable of functioning hours after the heart stopp beating caused Dr. Alvarez, a member of the division of medicine of the Mayo clinte, Rochester, Minn. to make the suggestion.

Reporting in the quarterly review of biology, published here, on a study he had made he said:

"Some day, when we learn how to prevent the autolysis (breaking down of their/own accord) of transplanted organs, surgeons will he seeking for the best methods of preserving vilsues a removed from healthy persons who have met sudden ideath. Already the Russians are expérimenting with red blood cells removed from the dead, such cells being kept on icuntil needed for transfusion."

Dr. Alvarez found that the time between stoppage of circulation

Dr. Alvarez found that the time between atoppage of circulation and frrepurable disintegration of the tissues ranged from a few minutes in the higher centers of the brain to several hours in certain nerve fibres of the abdomen. Some muscular tissue, he reported, had been made to survive for even what on temperature and other factors.

He may thus point as being of interest to the human race for a number of reasons. Before going into the possibility of body grafting, he suggested:

tatively for disposition first of the relief and some routine appropriation bills, and possibly extension of the "nuisance" taxes. Three problems probably will require a week or more of debate.

A leading opposition senator, who asked not to be quoted by rame, said a motion to take up the court bill might come from the foes unless Robinson takes the initiative within two weeks.

Another opponent, however, said his group expected to discuss strategy later this week before deciding whether to hasten the debate.

Once it does begin, they said, arguments on the bill adding up to six justices to the supreme court

THE HAND THAT ROCKS THE

This may be a man-tailored world to all appearances—but it is still the hand that rocks the cradle which rules it. And the band that rocks the throne, which is upsetting it.

What makes a man renounce all his royal rights to a soft seat on a throne for the sake of a woman. a throne for the sake of a woman abyhow? You've guessed the the woman! Because, a man almost never makes up his mind to marry, without a woman's heip. And the sweeter, gentler, and more femining the woman, the more per sistent her determination, and the

In fact it seldom is, it isn't the belilgerent Carrie Nations and the Belt's Lockwoods, who overturn governments and upset things, generally. And it is not title cos-headed, forthright, modern business girl who always gets her way. A busiwho always gets her way. A bust ness or professional woman soon discovers that the road to success

**C FLAG DAY*

After receiving his masters degree in agricultural science in 1894. Carver returned, Joined the faculty and taught that course. It has been as a teacher at Tuskegee Institute, the world's largest Negro institute of learning, that Carver has been on teacher at Tuskegee Institute, the world's largest Negro institute of learning, that Carver has been world-famed as a chemist. He is now a director of the department of agricultural research there.

His work has been in the field of bacterial laboratory work in systematic botany and his objective has been to diversify the one-crop agricultural system of the south.

I lo has developed more than 100 products from sweet potatoes and nearly 360 from peanuls, two crops which thourish in the particular aoil and climate of the section. The importance of this research is that it directly benefits the small southern farmer whose scale of operations are not sufficiently large to allow him to raise cotton with the L. L. Knight of Kenton talked

challow him to raise cotton with the attendant economies possible on inge plantations.

Research Methods Unique Carver's method of research is unique in itself. Meat mornings find him wandering through the fields and woods collecting epecimens of plants and herbs which he carries back to the laboratory to examine and analyze for their possible conumercial value. In this manner he has uncovered many new sources of revenue for the

farmers of Dixle.

Unmarried, and without a single known relative, Carver's life has been bound up entirely with his work. He lives simply, makes little quards on the of his nehlevements, but is recegnized as one of the outstanding nen in ble fleld.

Numerous honors have come his way; he is a member of the Royal Arts society of London; he was awarded the Springara medal in
